NEXORA / Screen & Project Stack

One-page brief | Current live storefront | 15 October 2026

CURRENT STOREFRONT SCREEN

Dark graphite marketplace, electric-blue accents, promotional hero, product imagery, search and shopping navigation.

LANGUAGES ACTUALLY USED

Language	Use in this project
TypeScript / TSX	Main frontend language: typed React components, page logic, API calls and state.
Python	Backend language: FastAPI routes, authentication, validation and commerce logic.
CSS	Tailwind utilities and global CSS define responsive layout, colors and typography.
JavaScript	Used for project configuration and the Node.js build/test toolchain.
SQL	PostgreSQL data/query language; SQLAlchemy generates queries and Alembic versions schema changes.

FRAMEWORKS & TOOLS

Layer	Frameworks / tools
Frontend	Next.js 16.4 App Router; React 19.3; Tailwind CSS 4.3.
UI	Lucide React, Radix UI, Recharts, CVA, clsx, tailwind-merge.
Backend	FastAPI; Pydantic 2; SQLAlchemy 2; Psycopg 3.
Database	PostgreSQL 16+; Alembic migrations.
Security	JWT HS256 expires after 12 hours; bcrypt password hashing.
Verification	Playwright E2E; Pytest; Next.js production build.

Data flow: Browser → Next.js → FastAPI REST API → PostgreSQL. Database credentials and JWT signing key stay backend-side.

Storefront features
Home, categories, product search/filter/sort, details, cart, wishlist, login/register, checkout (cash on delivery), addresses, orders, account and admin.

Run locally

```
cd backend; . env\Scripts\python.exe -m uvicorn app.main:app --reload
cd frontend; npm run dev
```

API URL: NEXT_PUBLIC_API (default localhost:8000).

Verified checks
Production build: passed
TypeScript: passed
Playwright: 11 passed
Backend Pytest: 5 passed
